

Artist Biography

June Jolly

I came to Australia in 1988 from the UK with my husband and two children Louise and Mandy.

I have always dabbled at art in many forms but have never had any confidence in myself to put anything out there to sell. I then discovered acrylic flow painting and enjoyed the process for a while, but I felt as if I was doing the same thing all the time.

I was watching videos of other people's work and not really getting any inspiration from them that I was happy to try. That's when I discovered resin.

The process was so interesting as resin has a mind of its own the things you start out doing don't always turn out the way you want them to and that's what I like about resin, one minute you can create something beautiful the next you look at your piece in horror. That's resin.
